Verein zur Förderung des
Leibniz-Instituts für
Polymerforschung Dresden

FRIENDS OF IPF

POLYMERS MATTER.

The **Leibniz Institute of Polymer Research Dresden (IPF)** is a leading materials science hub embedded in one of Europe's most dynamic research environments.

Driven by bioinspiration, enriched by data science and translational expertise, the institute is dedicated to both **fundamental and application-oriented polymer materials research**.

Together with partners in Dresden, within the Leibniz Association, and worldwide, we lay the foundations for advanced materials and systems that enable innovations related to **health, information, and sustainability**.

Our strong **commitment to technology transfer** is reflected in our close collaboration with industry and the establishment of numerous spin-offs.

Established in 1992, the non-profit Association of Supporters of the IPF has been dedicated to fostering connections between friends, staff, and partners of the institute.

Our aims:

- 1) Ensuring that members are informed about the latest developments in IPF research
- 2) Recognizing outstanding achievements by IPF scientists
- 3) Facilitating scientific exchange through various formats

FORGING CONNECTIONS ACROSS
ACADEMIA, INDUSTRY, AND CIVIL SOCIETY

As a **FRIEND OF IPF**, you benefit from

- up-to-date information on current trends in polymer research and IPF activities
- personal connections with IPF staff and members of the Association of Supporters
- exclusive access to inspiring events
- opportunities to participate in innovative research projects at the institute
- rapid transfer of research findings to industry
- for former IPF team members: a way to maintain connections with the institute and fellow alumni
