

Association of Supporters of the
Max Bergmann Center of Biomaterials Dresden

The Association of Supporters of the Max Bergmann Center of Biomaterials Dresden (Verein zur Förderung des Max-Bergmann-Zentrums für Biomaterialien Dresden e.V.) was founded in 2003 to stimulate interdisciplinary research in the field of biomaterials in cooperation with the Technische Universität Dresden and the Leibniz Association.

Aim of the association therefore is to support the education and training of young scientists and the technical staff as well as the intensification of the exchange of ideas and experiences.

The **main foci** are set on the organization of conferences, seminars and exhibitions as well as the publication of articles and the financial support of young scientists. For the first time we therefore plan in 2012 to award an Outstanding Biomaterials Thesis Award for an outstanding PhD dissertation, diploma or master thesis in the field of biomaterials.

To realize those goals and ideas the association needs your financial support. We are looking forward to your help, your donation is very welcome.

For any questions and support please address yourself to:
