

[Student Assistant] wanted

We are searching for:

- Dedicated and interested students who like to work independently and want to create their **graduation thesis**
- Field of study:
Material Science, Chemistry,
Chemical Engineering, Textile Processing,
Leightweight Design or similar subjects

What we offer:

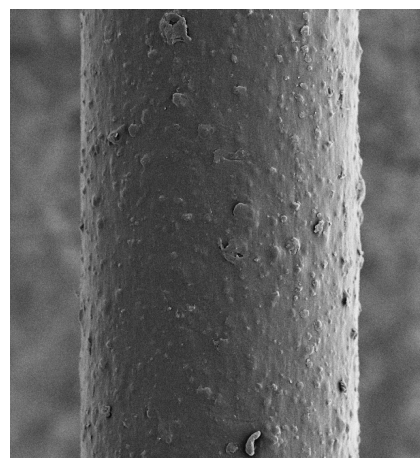

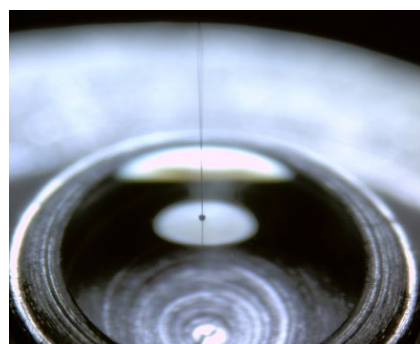

- Collaboration in the current Research Training Group - GRK2250
- Collaborative Research Center / Transregio – SFB/TRR280
- Excellence Cluster CARE:

Fibers / Interphases for
Concrete applications + Living Engineered Materials

- Interesting research with following topics:

Sustainable Materials, Glass and Polymer Spinning,
Surface Modification of Glass and
Carbon-Fibers, Interphase Characterization,
Micromechanical Analysis like
Single-Fiber-Pull-Out Test and much more

- Integration of students into the team and current research projects
